Architecture Diagram

Structure

Class name:	App.js
Parent class:	None
Subclasses:	None
Responsibilities :	This is the entry point of the application. It serves the navigation component.
Collaborators:	AppNavigator.js

Class name:	AppNavigator.js
Parent class:	None
Subclasses:	None
Responsibilities :	AppNavigator.js holds all the controllers, and allows the user to switch between each page.
Collaborators:	All controllers

Class name:	Firebase.js
-------------	-------------

Parent class:	None
Subclasses:	
Responsibilities :	Firebase.js provides the basic connection and configuration for using the firebase service
Collaborators:	All models

Models

Class name:	FileModel.js
Parent class:	None
Subclasses:	None
Responsibilities :	This class handles any requests to Firebase related to reading/writing to storage (images, etc)
Collaborators:	Firebase.js

Class name:	UserModel.js
Parent class:	None
Subclasses:	None
Responsibilities :	 This class handles any requests to Firebase related to User Information (e.g. Username, Password, Custom ACS score, etc.)
Collaborators:	Firebase.jsFileModel.js

Class name:	ACSModel.js
Parent class:	None
Subclasses:	None
Responsibilities :	 This class handles any requests to Firebase related to a User's ACS score
Collaborators:	UserModel.jsFirebase.js

Class name:	PredictionModel.js
Parent class:	None
Subclasses:	None
Responsibilities :	This class handles requests to Firebase related to a User's picks and predictions
Collaborators:	UserModel.jsFirebase.js

Class name:	AcitvitiesThreadModel.js
-------------	--------------------------

Parent class:	None
Subclasses:	None
Responsibilities :	This class handles requests to Firebase related to an activity thread.
Collaborators:	UserModel.jsFirebase.js

Class name:	DebateThreadModel.js
Parent class:	None
Subclasses:	None
Responsibilities :	This class handles requests to Firebase related to a debate thread.js
Collaborators:	UserModel.jsFirebase.js

Class name:	TriviaModel.js
Parent class:	None

Subclasses:	None
Responsibilities :	This class handles requests to Firebase related to trivia questions and answers
Collaborators:	UserModel.jsFirebase.js

Controllers

Class name:	PicksPredictionsController.js
Parent class:	None
Subclasses:	None
Responsibilities :	 The class will get the necessary teams and brackets to provide to the view The class will retrieve the picks and predictions from the view, to then send it to the PredictionModel
Collaborators:	PicksPredictionsView.jsPredictionModel.js

Class name:	ZoneController.js
Parent class:	None
Subclasses:	List all the subclasses separated by a comma.
Responsibilities :	The class will listen for user to choose which part of the app to navigate to while on ZoneView
Collaborators:	ZoneView.jsUserModel.js

Class name:	StartupController.js
Parent class:	None
Subclasses:	None
Responsibilities :	 The class will send login information to the UserModel for login The class will send registration information to the UserModel for registration The class will provide the necessary information to either RegisterView or LoginView for display
Collaborators:	RegisterView.jsLoginView.jsUserModel.js

Class name:	ProfileController.js
Parent class:	None
Subclasses:	None
Responsibilities :	 The class will get the user's information from the UserModel to then populate the view of the profile The class will listen for profile edits, and update the

	UserModel of those edits the user has made.
Collaborators:	ProfileView.jsUserModel.js

Class name:	SettingsController.js
Parent class:	None
Subclasses:	None
Responsibilities :	 The class will retrieve the user's custom settings that they want from the app The class will get any updated user settings and update the UserModel of these settings
Collaborators:	SettingsView.jsUserModel.js

Class name:	ActivitiesController.js
Parent class:	None
Subclasses:	None
Responsibilities :	The class allows users to contribute to discussions through ActivitiesThreadModel

Collaborators:	ProfileView.js
	ThreadModel.js

Class name:	DebateController.js
Parent class:	None
Subclasses:	None
Responsibilities :	This class allows users to contribute to discussions through DebateThreadModel
Collaborators:	DebateView.jsThreadModel.js

Class name:	TriviaController.js
Parent class:	None
Subclasses:	None
Responsibilities :	 This class feeds a "trivia game" to the view It will listen for user input and write to TriviaModel accordingly
Collaborators:	TriviaView.jsTriviaModel.js

Class name:	LiveController.js
Parent class:	None
Subclasses:	None
Responsibilities :	This class is a placeholder for a future feature
Collaborators:	• LiveView.js

Views

Class name:	PicksPredictionsView.js
Parent class:	None
Subclasses:	None
Responsibilities :	 represent the UI components for Picks & Predictions in the application
Collaborators:	PicksPredictionsController.js

Class name:	RegisterView.js
Parent class:	None
Subclasses:	List all the subclasses separated by a comma.
Responsibilities :	the UI component for Register in the application
Collaborators:	StartupController.js

Class name:	LoginView.js
-------------	--------------

Parent class:	None
Subclasses:	None.
Responsibilities :	the UI component for Login in the application
Collaborators:	LoginController.js

Class name:	ProfileView.js
Parent class:	None
Subclasses:	None
Responsibilities :	the UI component for Profile in the application
Collaborators:	ProfileController.js

Class name:	SettingsView.js
Parent class:	None
Subclasses:	None

Responsibilities :	the UI component for Settings in the application
Collaborators:	SettingsController.js

Class name:	ActivitiesView.js
Parent class:	None
Subclasses:	None
Responsibilities :	the UI component for Activities in the application
Collaborators:	ActivitiesController.js

Class name:	DebateView.js
Parent class:	None
Subclasses:	None
Responsibilities :	the UI component for Debate in the application
Collaborators:	DebateController.js

Class name:	TriviaView.js
Parent class:	None
Subclasses:	None
Responsibilities :	the UI component for Trivia in the application
Collaborators:	TriviaController.js

Class name:	LiveView.js
Parent class:	None
Subclasses:	None
Responsibilities :	the UI component for Live View in the application
Collaborators:	LiveController.js
